About Eduplana

Eduplana is a civic technology organization that uses data to advocate for quality education in Nigeria.

We believe every child has the fundamental right to equal 'Access to Quality Education' irrespective of their location or status in Nigeria.

By monitoring Education standards and performance in Nigeria; we aim to improve Accountability and transparency in Nigeria's Education Sector. Through engaging Federal and state Governments, we advocate for a strategic education plan with clear objectives that will prepare future leaders for a prosperous society.

Although we endeavor to provide accurate and timely information on our expert views which we believe are fact and data based.

No responsibility or liability is accepted for errors or for any views expressed in this document by Eduplana.

Context

Underfunding remains the biggest challenge facing the Education sector in Nigeria. Among the major challenges facing the education sector in Nigeria include lack of Education Management Information system, Out of School Children, Poor learning infrastructure, Pupil apathy, Obsolete curriculum design, Poor teachers' welfare and low learning outcomes. Despite the United Nations recommendation that developing nations allocate 20% - 26% of its budgetary allocation to the education sector for sustainable development.

The Nigeria govt has continued to underfund education which has led to poor state of quality education delivery to every citizen in Nigeria. Between 1999 – 2018, the Federal Govt has allocated a total N5.51 trillion to the education sector. Federal funding to the education sector has been abysmal and not enough to tackle the mounting challenges facing the education sector. In 2016, 2017 and 2018 the federal government allocated N489bn, N550bn and N650bn which represents 7.4%, 7.04%, 7.1% respectively. 54% of the 2018 Federal Government Education budget was allocated to Federal Universities with Basic Education across the 36 states and FCT remaining underfunded.

With the federal Government allocating N77.1bn, N95bn, N109bn from the 2% Consolidated Revenue Fund to the Universal Basic Education Commission (UBEC) in 2016, 2017 and 2018 respectively.

How are the 36 State Governments funding Basic Education to prepare future leaders in the 36 states of Nigeria?

Introduction

In an effort to improve quality education in the 36 States, we believe providing detailed information on States Education funding will enable Citizens to ask questions and demand that government plan education in their State.

The State Education Fund Report aims to assess how state governments prioritize 'Access to Quality Education' to every citizen in the 36 states of Nigeria and FCT. To this effect, we started gathering the education allocation of the 36 states across Nigeria.

In 2016 & 2017, Eduplana assessed education allocation of 20 states that made their states budget details available online. In 2016 & 2017, the 20 states had a combined education allocation of N427.5bn and N453.73bn respectively. In 2018, Eduplana assessed 6 more states education allocation taking the tally to 26 states with a combined allocation of N663bn.

The State Education Allocation showed Education percentage allocation to the state budget; the education allocation between 2016 – 2018 was highlighted while comparisons were made on the Year-on-Year difference and state rank among the 26 states accessed education budget.

Some of the empirical analysis made in the 2018 State Education Fund Report include the 2016 – 2018 States Education summary, 2016 - 2018 Education Allocation, States Education allocation percentage rank, 2017/8 States Education Allocation Year-on-Year Difference and 2017/8 States Education Allocation Percentage.

10 State
NOT Available

There's an increasing culture of transparency among State Governors to make their education allocation publicly accessible online.
25 States out of the 26 states made their 2018 education budget available online.
We encourage the 36 State governors to publicly make their education allocation available online.

STATES EDUCATION FUND (2018 REPORT)

STATES ALLOCATION RANK

Education investment has a RIPPLE EFFECT on the state's human capital development, economic future and the GOVT legacy.

As we approach the last FISCAL year for most State Governor's administration; We ADVISE that Citizens DEMAND that their State Governor increase their State Education Allocation to meet the UNESCO benchmark of 20% - 26%.

STATES EDUCATION FUND (2018 REPORT)

YEAR ON YEAR DIFFERENCE

When Citizens increase their Quality Education demand, State Governors will increase Education spending to implement their education policy.

In 2017, 10 States reduced their education spending and 7 states increased their education spending.

In 2018, only 4 states reduced their education spending while 14 States increased their education spending.

NOTE: * States that reduced their Education Allocation

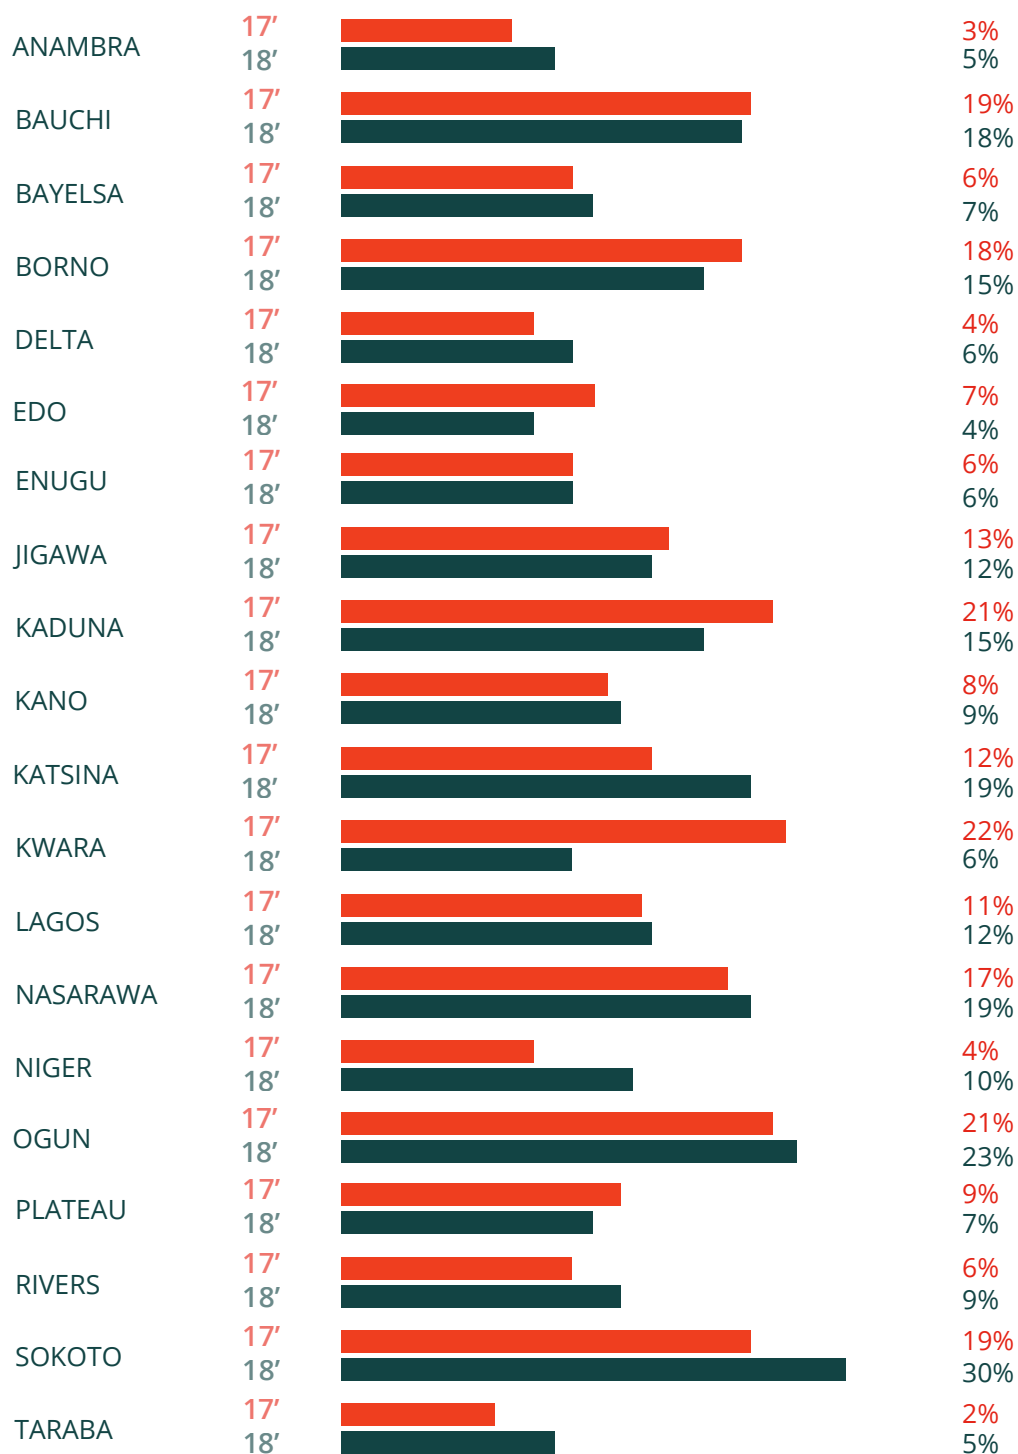

STATES EDUCATION FUND (2018 REPORT)

2017 & 2018 ALLOCATION PERCENTAGE

Despite the No. of Out of school children jumping from 10.5mn in 2010 to 13.2 in 2015.

Between 2017 & 18, 3 States (Ogun, Bauchi, Nasarawa State) has been the most CONSISTENT in maintaining their States Education Allocation Percentage.

Conclusion

Citizens must begin to increase the demand side of governance in Nigeria to enjoy the dividends of governance. Some of the areas citizens will need to focus on to improve Access to quality education to every child in Nigeria.

A well-detailed State Education Policy with clear objectives and indicators

The lack of a clear education policy by political office holders has hindered the delivery of quality education to citizens in Nigeria. Citizens should demand the education policy their representatives will adopt once elected into office so they can hold them accountable.

By identifying their focus areas, citizens can hold political office holders on the agreed performance indicators and measure their performance. An education Plan should contain the focus areas, the number of schools to be built/renovated, No. of trained teachers, pupil enrolment rate, allocation required to implement the policy during the administration.

State Government allocate education funding that meets the UNESCO Allocation standard

Budgetary allocations shows every administration priorities, therefore its important for citizens to drive discussion about their most important needs. Education is the cornerstone of national development; hence if citizens will have any hope of building a sustainable society, they should care about quality education delivery and the future.

UNESCO advise governments in developing countries to allocate 20% - 26% of its budgetary allocation to education sector. With the number of ills in the education sector, the least government can do is to allocate funds that will reduce the challenges facing quality education delivery in Nigeria.

Demand Accountability from government/Education Officials

To ensure government officials deliver on their campaign promise, citizens need to monitor different education projects and demand accountability. From the different budgetary allocations, citizens must demand Value-for-Money for the different education projects as listed in the budgetary line items.

www.eduplana.com
